LE DÉGRAISSANT

DEGREASING AGENT FOR AQUA CLEANING

DESCRIPTION :

LE DÉGRAISSANT  is a powerful cleaner - degreaser formulated for degreasing processes in Aqua cleaning and laundry.

This formulation is an aqueous microemulsion, formulated based on distilled essential oils, extracted from orange peel, allowing a double destructuring action on both grease, mineral or water-soluble dirt.

This product is formulated with raw materials of natural origin.

LE DÉGRAISSANT  is a high-performance, concentrated aqueous degreaser.

Its broad spectrum of effectiveness ensures the removal of difficult dirt and stains such as:

- oils and grease (of animal, vegetable or mineral origin), tar, bitumen, graphite, soot
- vegetable or organic stains
- urban pollution
- glues, adhesives, inks

LE DÉGRAISSANT  is effective for the maintenance of textiles in aqua cleaning. It can also be used pure or diluted in laundry, but also for floor coverings, carpets and rugs.

LE DÉGRAISSANT  is compatible with **LA LESSIVE ** et **L'APPRÊT **

DIRECTIONS FOR USE:

Injected on pump No. 2 to activate the degreasing action in aqua cleaning.

The dilution volume must be adapted to the type of clothes treated (between 50 ml and 100 ml depending on the capacity of the washing machine.

For a very large capacity, maximum 120 ml to 150 ml).

Dilution develops the foaming power.

The appropriate concentration and the optimal application process will be determined using preliminary tests.

COMPOSITION :

- Presentation: Clear non-foaming liquid
- Color: colorless to yellow
- Odor: orange
- Density (20°C): 1.002
- pH (20°C): 9

PRECAUTIONS FOR USE:

- Avoid contact with skin by wearing gloves
- Store in a ventilated place at a stable temperature

PROFESSIONALS USE ONLY
