

PREBRO LAB

PREBRUSHING DRY CLEANING

Universal pre-brush for hydrocarbon and perchlorethylene solvents

PREBRO LAB is an agent for pre-brushing greasy and lean soils before dry cleaning in *multi-solvent* and *perchlorethylene* machine

PREBRO LAB is formulated with surfactants promoting better fiber penetration to guarantee the best results in terms of preparation for dry cleaning.

PREBRO LAB applies to light stains but also to greasy stains (oily on collars, sleeve linings, trouser cuffs, trouser pockets, oily stains, sauces, etc.).

Only for perchlorethylene:

In the case of difficult light stains, a little water can be added with the pre-brush (1 volume of water for 2 volumes of product).

Material : Brush.

Implementation : Pure.

Operating Mode :

- apply the product neat on collars, sleeves or other stains or dirt.
- rub with a brush then put in the washing machine.

Note :

We recommend not leaving sensitive clothes treated with the pre-brush on hold for too long (max. 30 minutes before washing).

Recommendations :

Read the safety data sheet carefully before use.
We recommend the use of protective gloves.
